

WILL ANY PRE-CUT STEEL PART SOON NEED A CE LABEL? EN 1090 AND THE CONSEQUENCES FOR YOUR STEEL CONSTRUCTION

SUMMARY

EN 1090 establishes the requirements for the certificate of compliance for steel and aluminum sub-assemblies, as well as construction sets, put on the market as construction products. The seminar will explain the consequences of this European Norm for your enterprise. In addition all relevant processes with regard to the required intra-company production controls will be covered. Learn how we can support you with the implementation in your enterprise.

SUBJECT MATTER

- Presentation EN 1090
- What is an intra-company production control?
- Some material science according to EN 10025
- Introduction to flame-straightening
